

FULL- SPECTRUM CYBERSECURITY

SIEM • Threat Intelligence • DFIR

*built for real
operations*

Real protection, built
for real operations,
without enterprise cost
or complexity.

ABOUT SPYRASOC

SpyraSOC is a multi-tenant cybersecurity company designed to deliver affordable, enterprise-grade SecOps to regional Managed Service Providers (MSPs) and mid-market enterprises.

It bridges the gap between fragmented security tools and high, dollar-denominated vendor costs by offering a unified, sovereign, AI-native platform built specifically for emerging markets.

GOT QUESTIONS?

Quick answers before you reach out.

"Is this only for large enterprises?"

No, built for lean teams and MSSPs alike.

"Do you need cloud access to my data?"

No, fully self-hosted, zero cloud dependency.

"Does this replace our current security stack?"

No. It connects directly with your existing infrastructure, serving as a unified intelligence and correlation layer.

UNIFY

INVESTIGATE

DEFEND

SPYRASOC INTEL

Know your exposure before attackers do.

Proactive threat intelligence that identifies what's actually exposed about your organization, before it becomes an attacker's entry point.

01 Attack surface mapping

02 MITRE ATT&CK mapped threat context

03 Threat Intelligence correlation

04 AI-Generated Threat Briefings

*See your exposure before
attackers exploit it.*

*Sovereign SecOps for the Modern
Enterprise.*

Unified threat detection engineered
for emerging market SecOps.

Built to eliminate tool fragmentation,
It combines log monitoring, endpoint
telemetry, and response
orchestration, stopping the pivot
fatigue before threats escalate.

01 Multi-Tenant Core

02 Global Ticketing

03 Light SOAR Automation

04 Automated playbook
execution

SPYRASOC SIEM

SPYRASOC DFIR

Investigate fast. Respond faster.

When a breach happens, every hour
counts. SpyraDFIR automates log
analysis and evidence correlation,
turning raw data into a clear incident
report, cutting time from days to
hours.

01 Automated log ingestion &
correlation

02 AI-assisted incident
timeline reconstruction

03 MITRE ATT&CK-mapped
findings

04 Structured, ready-to-
share incident reports

*Built for fast, accountable breach
response*
